EXAMPLE SCORECARD · NOVEMBER 8, 2026

Money is leaking out of your practice.

Practices at the top level would collect **about $39,600** more per year with your numbers.

2 Watch 3 Problem

YOUR 5 KEY NUMBERS

How your billing compares

Each number is graded against two levels: **Good**, and what **top-performing practices** achieve. Tap a card to see what it means and how it gets fixed.

NET COLLECTION RATE

How much of what you're owed actually gets collected

92.5% ⚠ Watch

Score 72.5 / 100

Good: **95%** or higher Top: **98%** or higher

DAYS IN AR

How long it takes to get paid, on average

57.0 days ⚠ Watch

Score 63.8 / 100

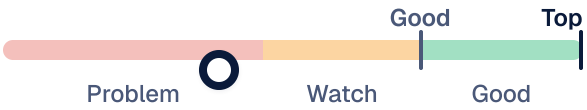

Good: **40 days** or lower

Top: **30 days** or lower

AR OVER 90 DAYS

How much of your unpaid money is over 90 days old

25.0% Problem

Score 45.0 / 100

Good: **15%** or lower Top: **10%** or lower

DENIAL RATE

How many claims get denied the first time

12.0% Problem

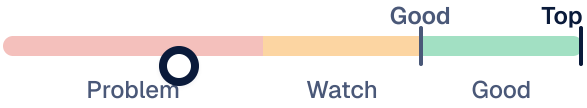

Score 48.0 / 100

Good: **5%** or lower Top: **3%** or lower

FIRST-PASS RATE

How many claims get paid on the first try

84.0% Problem

Score 36.0 / 100

Good: **95%** or higher Top: **97%** or higher

WHERE THE MONEY IS

What the gap means *in dollars*

Each card is a separate estimate with its own time unit, so they are never added together. The bigger number compares you with top-performing practices; the smaller one with the Good target.

UNCOLLECTED MONEY · PER YEAR · ESTIMATE

Money you are owed but not collecting

vs. top-performing practices

about $39,600 per year

vs. Good target

about $18,000 per year

Payments that should come in under your insurance contracts but are not being collected.

CASH THAT COULD COME IN FASTER · ONE-TIME · ESTIMATE

Money that could already be in your account

vs. top-performing practices

about $54,000 one-time

vs. Good target

about $34,000 one-time

If claims were paid as fast as the target, this much more cash would already be in your account. You get it once, not every year.

DENIED CLAIMS ABOVE TARGET · PER MONTH · ESTIMATE

Claims held up by denials

vs. top-performing practices

about $5,400 per month

vs. Good target

about $4,200 per month

Most denials can be fixed and recovered, but each one delays your cash and costs staff time.

MONEY STUCK OVER 90 DAYS · RIGHT NOW · ESTIMATE

Money stuck in old claims

about $28,500 is in claims over 90 days old right now.

vs. top-performing practices

about $17,100 right now

vs. Good target

about $11,400 right now

The older a claim gets, the harder it is to collect.

Targets are commonly cited industry benchmarks for US physician practices; 'top performer' reflects best-in-class levels. Estimates only.
